Dear Hiring Manager,

I found you are in search for a dynamic and highly motivated Software Engineer for your company. The job description is so exciting and very much closely matching my experience and ambitions. With a Bachelor's degree in Computer Science and hands-on experience using programming languages such as C, C++, Java, Python on Linux platform to create and implement highly sophisticated software applications for embedded devices such as handheld devices and head units mounted in car dashboard; I am confident that I can step in and make immediate contribution to the project and valuable contribution to Organisation's continued success.

As a software engineer at Organisation, I can collaborate closely with Customers, and help junior team members with my knowledge and experience. I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me, and I consider myself a quick learner. In addition, I consider myself a flexible, always wanted to take responsibility, take ownership of core components.

Few of my skills that I would like to highlight here, that enable me to contribute to the success of the company

- Complete understanding of SDLC (Software development life cycle)
- Highly skilled in designing, testing, and developing software for resource constraint systems
- Thorough understanding of Object Oriented Programming, data structures and algorithms
- Knowledgeable of agile development, best practices, clean code approach
- Hands-on software debugging experience
- Proper documentation, maintainable software development, eagle eye for quality

I've attached a copy of my resume that details my projects and experience in software development. Thank you for your time and consideration. I look forward to speaking with you about this opportunity.

Mit freundlichen Grüßen / Best regards,
Kalinga Bhusan Ray
