Letter of Recommendation for Kalinga Bhusan Ray

Kalinga Bhusan Ray has applied for the DAAD Prize for International Students. He is a student in the international program „Master of Research in Computer and Systems Engineering“ of the Department of Computer Science and Automation at the Technische Universität Ilmenau.

I know him from several of my courses on database systems topics in this program, which he finished with very good results. During his studies he was a diligent, open-minded student. He proved to be motivated and demonstrated the ability to quickly grasp and analyze difficult circumstances.

In addition, Kalinga is also engaged in various social activities on the campus. He was part of the ISWI and we4you team of the TU Ilmenau and has supported activities like the introductory week for freshmen. This shows his strong commitment to an integration with the campus life.

Thus, I would recommend him without objections for the DAAD price. Please feel free to contact me if you'd like to get any additional information.

(Prof. Dr. Kai-Uwe Sattler)
